

Recording at Home

This short YouTube Video gives excellent “How To” Basics for recording on an iPhone, smartphone, even a laptop.

How To Make a Selfie Video -> <https://youtu.be/Y9sAqLb1ISA>

A critical requirement when using an iPhone, smartphone, iPad or tablet is that you set up the device to record in the Horizontal / Landscape mode (see above) and at the setting of 16x9 aspect ratio.

There are several options for file transfer of your video file once recorded. We can discuss and review the options and use the format that you are most comfortable with.

Another option we can provide is to pre-record your performance together over Zoom!

What would be involved is a 30 minute Zoom booking/appointment before Monday, Nov. 23, where we will record your performance over Zoom! The benefit of this method is that there is no file transfer involved.

If you have any questions about recording your performance on your own device or via Zoom, please contact me via email at joanne@fairlawnavenueunited.ca.

Thank you!
